E-mail : chamelidebnath92@gmail.com

Professional Summary

JAVA developer with 10+ years of experience in application development environment. Proficient in Java-based technologies with a strong background in designing, developing, and maintaining scalable and high-performance applications. Adept at end-to-end software development including requirements gathering, system design, coding, unit testing, and documentation. Demonstrates strong problem-solving skills and project coordination abilities, ensuring efficient delivery of complex solutions. Having sound knowledge across **Banking Domain and Electronic Payment**.

Work Experience

- Worked as Senior Consultant at **Capgemini** from March 2022 to till date.
- Worked as an IT Analyst at **Tata Consultancy Services Ltd** from August 2015 – March 2022.

Technical Skills

Operating System	Windows XP/8/10/11, Linux
Environment	Client VDI
Database	MySQL, Oracle, MS SQL Server
Tool used	IntelliJ, Spring Tool Suite (STS), Eclipse, VS Code
Languages	Java/Java8, J2EE, Web Services (REST), Spring boot, Microservices / AppEngine flex microservices (GCP), Hibernate, JPA, Kafka
Other	GIT, Maven, Jenkins, SonarQube, GCP, AWS (Cloud watch, EKS)

Professional Experience

Project 1: Working for BDO (Philippines) Bank as Tech Lead

BDO is a retail banking platform where the users can do financial transaction to other bank accounts via several mediums like Immediate, QR scanning, wire transfer, Instapay etc.

- Working as senior developer and Team Lead.
- Requirement Analysis and Designing.
- Co-ordination with other vendors for E2E delivery for each feature.
- Involve in production deployment.
- Doing code review.

Environment: JDK11, Spring Boot Microservices, AWS, MySql

Project 2: Global Payments as Senior Developer

SK Generator microservice is developed to generate unique Surrogate Key (SK) for credit cards. Microservice (MS) lookups Bigtable and Redis and if card present in Bigtable or Redis (for existing cards), microservice returns SK, Global Token (GT) and Merchant Token (MT). If detail does not present in Bigtable and Redis (for new cards), microservice lock the Redis for the SK, generate the SK and insert details in Redis. Once SK is generated, MS publish the pub sub message to GTMT generator.

- Developed new AppEngine flex microservice as per requirement using Spring Boot.
- Used GCP Bigtable and Redis to store data.
- Used pub/sub message to publish data to another service (GTMT generator).
- Provided Testing support in test environment.
- Bug Fixing, Maintaining code quality, AppEngine Deployment support, Documentation

Project 3: Netspend as Senior Developer

EMAILHYGIENE MS is created to provide email validation for netspend GPR and DDA online card order using third party webbula service. Emailhygiene MS validates user emails and publish data (entire response with account Id) to the KAFKA. Based on marketing element i.e. netspend_online distributor validate request and send request from UI to the email hygiene microservice through acquisition api, then emailhygiene microservice call third party webbula through netSpend's outbound gateway (NOG) and publish data to the KAFKA topic.

- Developing new microservice as per requirement using Spring Boot framework and MySQL database as per requirement.
- Used KAFKA topic to publish data.
- Used third party Webbula service to validate customer email.
- Used Junit and Mockito framework for unit testing.
- Provided Testing support in test environment, Bug Fixing, Maintaining code quality, Deployment support and documentation.

Project 4: Diligenta (Quality Audit Tool) as Senior Developer and Tech Lead

QAT is a auditing tool, allows user to do the quality checking for Back office workflow processed on BaNCS . The tool is developed for two level of auditing. Quality data are loaded into the system through file upload in _xls format and used as an audit input of QAT. After the first level of audit, audited records will be amended and then perform second/final level of audit i.e. audit the audit. The tool is access controlled and has various user roles with defined permission levels within. Users have different roles to perform different operations and one user can have access to multiple roles.

- Requirement gathering, Development of services as per requirement using Spring Boot, Spring Batch and MySQL.
- Spring Batch development.
- Supervising team to develop and deliver the deliverables within time.

Project 5: Diligenta (Diligenta Reconciliation System) as Developer

DRS is a tool that is used for Business and Financial transaction handling. This is a in-house tool built to save £250k for the renewal of existing system. The tool is basically used for matching large volumes of data for Phoenix and Friends Life/Aviva accounts. It has both Batch and Web designed. The batch runs on daily basis to process large amount of input outstanding data and runs a system match for Bank. (Statements and Cashbooks) and Ledger (Payments and Receipts). Whereas the Web lets user to login into the application and can perform tasks such as add/edit/delete accounts, update outstanding data and for the manual or recommended matching. The tool also lets the user to search globally across every account. The matching is defined by the set of rules based on amount credited and debited, BaNCS reference number,

processing date, transaction number, cheque number and payee details.

- Developing new services as per requirement using Spring Boot, Spring Batch, Spring JDBC framework as per requirement.
- Provided Testing support in test environment.
- Bug Fixing, Maintaining code quality, Deployment support, Documentation

Professional Skills

- Excellent communication, interpersonal, intuitive, technical, and leadership skill.
- Willing to learn new technologies and applications.
- Self-starter, Fast learner, Result Oriented with good communication and interpersonal skills.
- Has the motivation to take independent responsibility as well as ability to contribute and be a productive team member

Training / Certification

- **Google Cloud certified Associate Cloud Engineer certification.**
- Agile Fundamentals.
- Capgemini Level 1 and Level 2 Certified in Global Banking and Global Insurance.
- 3 months TCS ILP Training on Software Engineering, Java, PL-SQL, Unix, Behavioral Training.

Academic Qualifications

- B.TECH from Netaji Subash Engineering college under MAKAUT, *West Bengal in 2015.*
- Diploma in Information Technology from Women's Polytechnic under Tripura University, Tripura in 2012.
- 10th from Tripura Board of Secondary Education, Tripura in 2009.

Declaration

I hereby declare that the particulars given above are true and correct to the best of my knowledge.
